

Earth Children Solidarity Tree Domes

Earth:

We create public meeting-places in which children and adults are encouraged to listen to themselves and the Earth and express their visions of the future of mankind and the planet.

Children:

With the “Earth-Children-Solidarity-Tree Domes” we focus public awareness on the importance and significance of all children on this earth, together with their visions of the future of mankind and our planet. We do that with the children`s own paintings and texts- in exchange world-wide; in altering exhibitions in the “tree domes”

Solidarity:

Our intention is, that world-wide as many “tree domes” as possible emerge, aiding and communicating with each another and forming a network spanning the globe. Our dream is, to achieve a living solidarity with one another and conciliation between children from poor and rich countries.

Tree Domes:

The living symbol of a circle of trees around a big “Earth-ear”, a small tree nursery and the children`s painting gallery should bring the affinity of all children and their growing significance for the future to expression creatively world-wide.

Every person on this Earth can take part in this large-scale project at any time! Start now!
